PROFICIENT IN

SKILL SET

system architect

Specializing in backend development on LAMP platforms as well as Linux server configuration, management and troubleshooting.

api friendly

Familiar with developing and working with APIs to any project's advantage.

always learning

Proven ability to pick up new technologies, languages and methods to achieve any goal.

PROGRAMMING LANGUAGES

I've created and maintained small to large scale applications with PHP and perl. Very comfortable with the linux command line and shell scripting. Knowledgeable enough with Objective-C to have published a few iOS apps. Languages like JavaScript, Ruby and Python are familiar enough to write small scripts or debug/troubleshoot without difficulty.

TECHNOLOGY

I'm very familiar with the LAMP stack while not strictly sticking with apache, mysql and PHP. I have been using MongoDB in recent (2010) projects when appropriate. As a developer I have always taken an interest in the infrastructure and environment that code lives in.

WORK HISTORY

Synacor, Inc.

SENIOR SOLUTIONS ADMINISTRATOR - EMAIL (2014 - PRESENT)

Responsible for investigating, architecting, and providing reports relating to migrating a user's email from external systems to Synacor's mail platform.

**SENIOR ENGINEER (2013 - 2014)
ENGINEER (2012 - 2013)**

Worked with internal and client facing APIs, provided reporting, reconciled data and worked on the backend infrastructure of multiple systems. Most products I have worked on had to perform well with a high load of traffic, be highly available and contain some level of testing.

Localnet Corporation

**SENIOR PROGRAMMER (2009 - 2012)
PROGRAMMER (2005 - 2009)**

Software Developer of a small group (2 to 4 person team.) Maintained CRM, customer acquisition, user management, and billing systems. Provided reporting and data as needed. Reconciled data to support upgrades and reduce data inconsistencies.

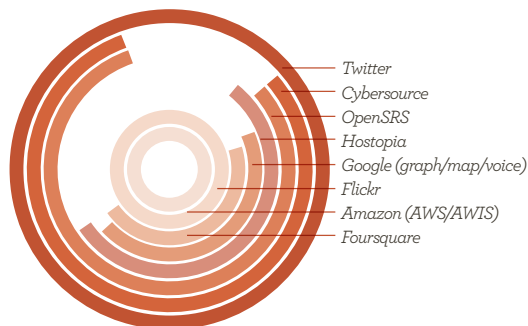

Localnet Corporation | TECHNICAL SUPPORT REPRESENTATIVE (2002 - 2005)

Apple | SALES ASSOCIATE (2001 - 2002)

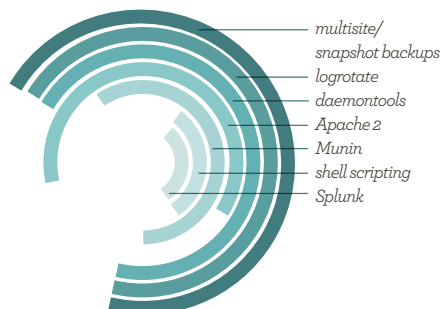

ClientLogic | TECHNICAL SUPPORT REPRESENTATIVE (2000 - 2002)

At both ClientLogic and LocalNet, I provided technical support via phone, email and chat. I also maintained high levels of customer service, first call resolution and low call times. My time at Apple was spent working at a new retail location and answering questions about products.
